

Nixara

A recommendation tool. Nixara suggests the decision; you make it.

Every figure is worth checking before you act on it.

NIK·SA·RA /NIK'SCI:RƏ/ · from *nix* (clarity, light) + *ara* (direction) — illuminating the path forward in your data

HEALTHCARE_DATASET.XLSX · 55500 ROWS

ROWS	COLUMNS	NUMERIC FIELDS	QUALITY SCORE
55,500	15	3	100

Nothing knocked this down

No blank-heavy or mixed-type columns, at least one measurable metric, and a workable number of rows and columns.

Name	Age	Gender	Blood Type	Medical Condition	Date of Admission	Doctor	Hospital
Bobby Jackson	30	Male	B-	Cancer	Jan 31, 2024	Matthew Smith	Sons and

Leslie Terry	62	Male	A+	Obesity	Aug 20, 2019	Samantha Davies	Kim Inc
Danny Smith	76	Female	A-	Obesity	Sep 22, 2022	Tiffany Mitchell	Cook PL
Andrew Watts	28	Female	O+	Diabetes	Nov 18, 2020	Kevin Wells	Hernand
Adrienne Bell	43	Female	AB+	Cancer	Sep 19, 2022	Kathleen Hanna	White-W
Emily Johnson	36	Male	A+	Asthma	Dec 20, 2023	Taylor Newton	Nunez-H
Edward Edwards	21	Female	AB-	Diabetes	Nov 3, 2020	Kelly Olson	Group M
Christina Martinez	20	Female	A+	Cancer	Dec 28, 2021	Suzanne Thomas	Powell R
Jasmine Aguilar	82	Male	AB+	Asthma	Jul 1, 2020	Daniel Ferguson	Sons Ric
Christopher Berg	58	Female	AB-	Cancer	May 23, 2021	Heather Day	Padilla-V

Name any of these in your question to chart it: **Gender** (2) · **Blood Type** (8) · **Medical Condition** (6) · **Insurance Provider** (5) · **Admission Type** (3) · **Medication** (5) **+1 more**

REPORT SETUP

Common decisions (optional starting point)

Pricing / discounting

Cost reduction

Expansion / hiring

Customer retention

Operational efficiency

Risk / compliance

Decision Context

We need to cut billing exposure by 10% next year. Which condition, insurer or admission type should we target first, and what would that save?

Role

COO

Time Horizon

This quarter

AI REPORTS

Executive Summary Operational Detail **Risk Report**

Reading this report: 🔍 **source** traced to your data 🧮 **calculated** computed by Nixara from your data
unverified could not be matched, may still be right

Nixara checked this report against your file and changed 3 numbers

A first draft cited figures that matched nothing in your data. Nixara asked for a rewrite, and this is the result.

FIRST DRAFT SAID	WHERE	OUTCOME
20%	Top Risks Identified	number removed, wording kept
15%	Top Risks Identified	number removed, wording kept
\$25,000.00	Early Warning Signs	number removed, wording kept

Being unmatched does not make a figure wrong. It means Nixara could not prove it from your data, so it chose not to stand behind it.

TOP RISKS IDENTIFIED

1 **Likelihood: Medium**

STRATEGIC

☐ Likelihood **Medium** · Impact **High**

Signal: Cigna has the highest total billing amount at **\$287,139,345.16** 🔍 **source**

Consequence: Potential policy changes by Cigna could lead to increased billing exposure.

2 **Likelihood: Medium**

OPERATIONAL

☐ Likelihood **Medium** · Impact **High**

Signal: Diabetes has the highest total billing amount by medical condition at **\$238,539,725.40** 🔍 **source**

Consequence: Unmanaged billing may lead to substantial financial strain if costs rise.

3 **Likelihood: Medium**

OPERATIONAL

☐ Likelihood **Medium** · Impact **Medium**

Signal: Admission types, not detailed in numeric value, show varied billing impacts

Consequence: Lack of targeted strategies can boost billing exposure if not addressed.

EARLY WARNING SIGNS

Monitoring number of high-billing medical conditions like Diabetes and Obesity.

Tracking changes in policy terms from major insurance providers such as Cigna and Medicare.

Observing shifts in patient admission types contributing to higher billing.

MITIGATION ACTIONS

Finance Team

Negotiate terms with major insurance providers like Cigna to reduce reliance

Start within 1 month

Medical Team

Implement cost management programs for high-billing conditions such as Diabetes

Start within 2 months

Operations Team

Review and optimize admission protocols to manage billing exposure effectively

Start within 1 month

DATA QUALITY RISKS

100

Data quality is strong. Detected outliers in billing amounts reflect business patterns — treat as signals, not data errors.

Columns Nixara did not measure 2 columns

Date of Admission

dates, which are points in time rather than amounts

Discharge Date

dates, which are points in time rather than amounts

A column has to be at least 80% numbers before Nixara will total or average it. Averaging the rest would describe a fraction of your rows as though it described all of them. Dates, calendar years and coordinates are positions rather than amounts, so they are never measured even when complete.
