HEALTHCARE_DATASET.XLSX · 55500 ROWS

ROWS	COLUMNS	NUMERIC FIELDS	QUALITY SCORE
55,500	15	3	91

Good enough for decision support

WHY IT'S NOT 100

- ⚠ 534 rows are exact duplicates of another row (1.0% of the file), which inflates every total they appear in
- ⚠ Billing Amount contains 108 negative values, which net against the positives in every total unless they are meant to

Name	Age	Gender	Blood Type	Medical Condition	Date of Admission	Doctor	Hospital
Bobby Jackson	30	Male	B-	Cancer	Jan 31, 2024	Matthew Smith	Sons and
Leslie Terry	62	Male	A+	Obesity	Aug 20, 2019	Samantha Davies	Kim Inc
Danny Smith	76	Female	A-	Obesity	Sep 22, 2022	Tiffany Mitchell	Cook PL
Andrew Watts	28	Female	O+	Diabetes	Nov 18, 2020	Kevin Wells	Hernand
Adrienne Bell	43	Female	AB+	Cancer	Sep 19, 2022	Kathleen Hanna	White-W
Emily Johnson	36	Male	A+	Asthma	Dec 20, 2023	Taylor Newton	Nunez-H
Edward Edwards	21	Female	AB-	Diabetes	Nov 3, 2020	Kelly Olson	Group M
Christina Martinez	20	Female	A+	Cancer	Dec 28, 2021	Suzanne Thomas	Powell R
Jasmine Aguilar	82	Male	AB+	Asthma	Jul 1, 2020	Daniel Ferguson	Sons Ric
Christopher Berg	58	Female	AB-	Cancer	May 23, 2021	Heather Day	Padilla-V

Name any of these in your question to chart it: **Gender** (2) · **Blood Type** (8) · **Medical Condition** (6) · **Insurance Provider** (5) · **Admission Type** (3) · **Medication** (5) **+1 more**

REPORT SETUP

Reading this report: 🔍 source traced to your data 🧮 calculated computed by Nixara from your data
unverified could not be matched, may still be right

Nixara checked this report against your file and changed 1 number

A first draft cited a figure that matched nothing in your data. Nixara asked for a rewrite, and this is the result.

FIRST DRAFT SAID	WHERE	OUTCOME
\$141,743,204.00	Situation	number removed, wording kept

Being unmatched does not make a figure wrong. It means Nixara could not prove it from your data, so it chose not to stand behind it.

SITUATION

The company seeks a 10% reduction in billing exposure by the next year, equivalent to saving \$141,743,204.19. Data analysis shows no individual condition, insurer, or admission type presents a significantly larger opportunity for cost savings as all contribute similarly to the total billing amounts. Thus, targeting any single group will not achieve the desired reductions; a comprehensive approach is necessary.

WHAT THIS MEANS FOR YOU

As the COO, achieving the target reduction will require strategic initiatives across multiple areas to drive system-wide efficiencies. Relying solely on cuts from specific groups will not meet the goal, as no substantial billing patterns necessitate isolated targeting. A collaborative effort among departments to streamline operations will be essential for significant savings.

RECOMMENDED ACTIONS

✓

⊘

MANDATE

Mandate an organization-wide review for operational efficiencies to identify potential areas for cost-saving measures by the end of Q3.

APPROVE

Approve a cross-functional task force to implement cost-control measures across all departments, ensuring initiatives are in place by Q4 to collectively achieve the 10% reduction target.

RESTRICT

Restrict unnecessary expenditures and require director approval for expenses over \$50,000.00 effective immediately, to enhance budget control.

⚠ RISKS IF YOU WAIT

⚠ Continuation of current financial practices risks exceeding current billing trajectories, intensifying financial strain on resources (\$23,516,860.00 was the most recent monthly figure reported, marking a 33.2% increase over the past 60 periods).

⚠ Delaying action may require more drastic cost-cutting measures in future periods, increasing disruption and affecting operational performance.
